

Provident Energy Management is a leading provider of sustainable solutions to the commercial and high-rise residential building industry. Our key service lines include LEED and sustainability consulting, green building technology research, commissioning, submetering, and monitoring of energy management systems; with a strong focus on the high-rise residential sector.

Provident is a member of the Tridel Group of Companies, Canada's largest builder of sustainable communities.

Due to continued growth we are seeking **various sustainable building professionals** to join the sustainable building consulting team in our Toronto office.

Project Manager, Sustainable Buildings

Posting Date: December 1, 2011

Key Responsibilities

- Lead the green building development process from project inception through to final certification
- Chair integrated design meetings including presentation of energy studies and sustainable design alternatives
- Provide senior technical, strategy, and management support to colleagues
- Support research, energy modeling, and commissioning activities within our organization and with key industry partners

Qualifications

- Degree or diploma in engineering, architecture, environmental studies, construction technology, or a related field
 - Minimum 4 years experience in the Canadian green building industry, including at least 2 years direct experience in LEED project documentation
 - LEED AP BD+C designation
 - Experience in the multi-unit residential sector would be an asset
 - Experience / interest in next-generation energy tools such as E+, IES, Revit, and Green Building Studio would be an asset
-
